Professional Summary

Computer Science Undergraduate with a strong foundation in **Data Structures and Algorithms** and **Software Development Fundamentals**. Skilled in applying problem-solving techniques and complexity analysis using C++. Proficient in **Object-Oriented Programming** and **Database Management Systems**, with the ability to design structured and efficient solutions. Currently exploring the **MERN stack**, building projects alongside to strengthen frontend development skills and develop dynamic, user-focused web applications.

Technical Skills

Core Computer Science	Data Structures and Algorithms (DSA), Object-Oriented Programming (OOP), Database Management Systems (DBMS), Operating Systems (OS)
Programming Languages	Java, Python, JavaScript, C, C++
Web Technologies	HTML5, CSS3, Responsive Web Design

Education

B.Tech in Computer Science , Parul University, Vadodara CGPA: 9.21 Sem I: 9.00 Sem II: 9.05 Sem III: 9.50	2024 – Present
Class XII (CBSE) Percentage: 81.00	2024
Class X (CBSE) Percentage: 92.60	2022

Hackathons & Experience

LinkedIn CoachIn Program 2026 — Mentee LinkedIn Mentorship Program	2026
--	------

- Selected among the **Top 80 participants out of 21,000+ applicants** for the LinkedIn CoachIn Program 2026.
- Participating in a structured mentorship initiative connecting students with **LinkedIn engineers and industry mentors**.
- Receiving guidance on **Data Structures, Algorithms, technical interviews, and career development**.

LinkedIn Internal Hackathon — SETU

LinkedIn CoachIn Program

- Secured **2nd Place** for developing **SETU**, a platform designed to help **blue-collar** and **skilled workers** connect with relevant **employment opportunities** through **AI-driven profile creation** and **job matching**.
- Collaborated on **solution design, feature prioritization, and presentation**, contributing to a prototype recognized for its **real-world impact** and **deployment potential**.

Projects

Studio Namma HTML, CSS, JavaScript	GitHub Live
--	---

- Recreated a **studio-inspired digital experience** to explore modern frontend design patterns.
- Built **scroll-based animations** to create engaging visual storytelling across sections.
- Developed **interactive overlays and hover effects** to improve content exploration.
- Applied **JavaScript-driven UI interactions** for seamless page transitions and animations.

Yucca Packaging Website Clone HTML, CSS, JavaScript	GitHub Live
---	---

- Built a **visual clone of the Yucca Packaging website** to understand real-world landing page structure.
- Implemented layouts using **Flexbox** to maintain consistent alignment and spacing.
- Recreated **typography scale and layout proportions** using pure CSS.
- Used **semantic HTML** and **modular CSS** for a clean and maintainable codebase.

Achievements

- **Cleared Round 1 of Google The Big Code 2026**, successfully qualifying for the **second round** by ranking among the **top 15,000** performers nationwide.
- Secured **3rd rank** in the **1st Semester** among students in the **B.Tech Computer Science** program.
- Solved **400+ Data Structures and Algorithms problems** on LeetCode.
- Earned **100 Days Badge on LeetCode** for maintaining consistent daily problem-solving.

Certifications

Information Technology Specialist: JavaScript — Certiport / Pearson	2025
Python Programming — IBM / Etrain Education	2025
Information Technology Specialist: HTML and CSS — Certiport / Pearson	2025
Operating Systems Basics — Cisco Networking Academy	2025
